

Offering Custom Production,
Tetramers, and More.

April was another action-packed month at HLA Protein. Outside of supporting our customers and collaborators, our team attended the European Federation for Immunogenetics (EFI) conference and made some very exciting progress on several new partnerships we hope to share with you soon. We continue to develop new product offerings that we will be rolling out in the next weeks and months and are receiving very positive reports from our customers and collaborators on the quality of our proteins and the favorable impact these are having on their research. Let us know how we can help support you and your next project!

DID YOU KNOW?

HLAprotein.com not only hosts the largest selection of Class I and Class II HLA proteins, we are also here to provide customers like you with custom solutions that meet your specific research needs. Whether you need larger quantities of proteins, specific peptide loading, custom tetramers, or an HLA reagent not featured on our website, we are happy to help you. Since the launch of our site we have been humbled by the support and unique requests that have come from our customers. If you have a specific inquiry, project request, or simply need guidance, please send us your thoughts through our Customer Support Form and we'll be sure to respond quickly.

Do you need help with:

- Larger quantities?
- A specific peptide
- Assay development?
- Custom production?
- Tetramers for functional assays and immunizations?

Did you miss us at EFI 2021?

HLA Protein was an exhibitor at the 34th European Immunogenetics and Histocompatibility Conference online April 21 - 23, 2021. If you were unable to attend the virtual event, you can still access the brochures we shared and Dr. Rico Buchli's video presentation discussing the many features of the hlaprotein.com website and the benefits and applications of our HLA proteins and services.

Have you secured a spot for Pure MHCs webinar on May 18?

WEBINAR

HLA Peptide Target Discovery - Mitigating Risk In Target Selection

Tuesday, May 18, 2021
10:00 AM CDT

[REGISTER](#)

Meet our Researchers

William Hildebrand, PhD
Chief Scientist

Curtis McMurtrey, PhD
Director of Immunoproteomics

Saghar Kaabinejadian, PharmD, PhD,
Director of Immuno-Oncology

Rico Buchli, PhD
Director of Research

Pure Protein company, [Pure MHC, LLC](http://PureMHC,LLC), will be hosting a digital event, "HLA Peptide Target Discovery – Mitigating Risk in Target Selection". Hear fellow scientists share data and learnings drawn from decades of experience identifying and validating HLA peptide targets for therapeutic development. Special emphasis will be given to mitigating risk in preclinical target selection for oncology and infectious disease indications. This event is complimentary to attend, but registration is required and space is limited!
